Art Unit: 1634

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-10, 13, and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are vague, indefinite, and incomplete.

- (a) The recitation of "determining the status of p53 (TP53) gene" (claim 3) is vague and indefinite because the meaning of the term within the context of the claim is not understood.
- (b) The recitation of "genetic status of p53 (TP53) (claim 5) is vague and indefinite because the meaning of the term within the context of the claim is not understood.
- (c) The recitation of "each subject" (claim 7) is incomplete because there is no antecedent basis for the term.
- (d) The recitation of "level of p21 expression" (claims 13 and 14) is vague and indefinite because the meaning of the term within the context of the claim is not understood.
- (e) The recitation of "enhancing the activity" (claim 14) is vague and indefinite because the instant application does not define what is meant by the term and there is no art-recognized meaning for the term.
- (f) The recitation of "therapeutically effective amount" (claim 14) is incomplete because the claim does not indicate with clarity what the therapeutic effect is.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 1634

Claims 3-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims do not recite or result in a transformative result, but merely recite methods of comparison. For example, there are no steps for obtaining a sample or treating a subject as a result of the claimed steps.
